AGAVE FLIGHTS

3oz

Current Obsessions — 40

We cannot get enough of these three blanco expressions. Together, they showcase the wide range of complex flavors found in agave azul.

Cascahuin Tahona, G4 Fermentada de Madera, Fortaleza

Straight from the Still — 55

More heat, more flavor. These powerful and decadent still-strength blancos showcase the spirit in it's pure, undiluted form.

Volans Still-Strength, Tapatio 110, Caballito Cerrero Azul Puntas

Extra, Extra — 200

These long-aged extra anejos test the limits of decadent tequila, extracting every drop of flavor the barrel has to offer. Sometimes, the best things in life are worth waiting for.

Volans 6yr, G4 7yr, Fuenteseca 9yr

Capón — 65

These espadín expressions show that patience pays off. When the plant reaches maturity, the quixote is cut, concentrating the sugar in the pina. As the plant lives out it's final years, these sugars reach new levels of complexity that would not be possible without intervention.

5 Sentidos, Pal'Alma Puebla, Lalocura

Revelry — 55

Jolgorios are small festivals that occur in the remote villages of Oaxaca. For centuries, mezcal has been their lifeblood. El Jolgorio represents 16 families working together to celebrate their stories.

El Jolgorio Tepextate, Barril, Cuishe

AGAVE TEQUILANA

There are over 200 species of agave, the majority indigenous to Mexico. While many different agave are used in the production of mezcal, there is only one type that is used in the production of tequila, agave tequilana, also known as "blue agave."

AGAVE KARWINSKII

TECHUACAN VALLEY & CENTRAL OAXACA | This species can be divided into two variants, those with low sugar and high sugar. Those with low sugar have concentrated acidity and bitterness with coffee notes (cuixe, largo, tobasiche). The high sugar variants produce brighter and fruitier distillates and sometimes nutty flavors (madrecuixe, bicuixe, barril).

AGAVE DURANGENSIS

DURANGO & ZACATECAS | One of the only species found in Northern Mexico. The dry, arid climate of Durango produces the earthy, mineral driven characteristics that we also find in cupreata.

	1oz	2oz
Bozal Cenizo	13	26
La Venenosa Sierra Volcanes de Jalisco	18	36

AGAVE POTATORUM

OAXACA & PUEBLA | Known as the king of agave, this small agave is highly sought after. It thrives on rocky hillsides under the shade of an oak tree, making the harvest difficult and time consuming. It is fairly sweet and produces nutty and buttery flavors with hints of tropical fruit. Once considered impossible to cultivate, this maguey is now grown in nurseries throughout Oaxaca.

Siembra Metl Cupreata	13	26

AGAVE MARMORATA

SOUTHERN MEXICO | The flavor of this mezcal can have intensely "green" flavors due to the large amount of wax covering it's leaves. It grows in areas with heavy precipitation during the rainy season and it uses this wax as a defense mechanism. It has very low genetic and morphological variation within the species, so differences in flavor clearly reveal the production decisions of the mezcalero. These gentle giants may take upwards of 25 years to reach maturity.

Rey Campero Tepextate	22	44

AGAVE CONVALLIS

Jabali is Spanish for "wild boar." This rare agave is always harvested wild in small quantities as it grows on cliffsides at high altitudes. It is a difficult agave to work with in fermentation and distillation due to the high level of protein structures which will foam and increase pressure in the still, occasionally causing it to explode. It produces exotic mezcales with an herbaceous and vegetal flavor profile.

	1oz	2oz
5 Sentidos Jabali	22	44
Bozal Jabali Ancestral	18	36
Rey Campero Jabali	20	40

AGAVE AMERICANA

The morphological variations in this species are vast, resulting a wide variety of potential flavors. Mezcales made from coyote are dark and mysterious, while those made from Arroqueño are sharp, green, and chalky.

AGAVE IMPRESSA

ESCUINAPA, SINALOA, MEXICO | Tutsi is the local name used by the Huichol people who produce this agave spirit. This community is most well-known for their intricate, techni-colored beadwork.

	1oz	2oz
La Venenosa Etnica Tutsi Masparillo	39	78

MEZCALES DE CELEBRACIÓN

PECHUGA, ELOTE | Before celebratory events such as birth, weddings, and quinceaneras, barter-based economic communities will bring produce and livestock to the mezcalero who will redistill their mezcales with those items in the still. Not all of these products contain livestock, some are vegetarian and only contain produce.

MEZCALES DE CAMPO Y ENSAMBLES

With an ancestral mezcal production, the mezcalero has the potential to be mobile due to the lightweight nature of the still and use of natural materials. Historically many mezcaleros would follow a fresh water source, using whatever agave they find in their vacinity. This nomadic way of working protects the fields from over-harvesting, allows agave to reproduce naturally through their quixote, and ensures that a mezcalero uses all available agave, instead of only the most sought after species.

SOTOL

Sotol, is a spirit closely related to Mezcal in flavor and production, but made from a plant of a different genus in the Asparagaceae family, Dasylirion. These plants are commonly referred to as "the Desert Spoon."

DASYLIRION WHEELERI

CHIHUAHUA, COAHUILA & DURANGO | This plant is the most commonly used in the making of sotol and inhabits rocky hillsides and grasslands. Its flavors range from earth, smoke, and pepper to fruit and herb.

	1oz	2oz
Flor del Desierto Sierra	12	24
La Higuera	6	12

DASYLIRION CEDROSANUM

CHIHUAHUA, COAHUILA & DURANGO | Sotol plants strongly capture the terroir in their flavor profiles. Dasylirion cedrosanum can be found growing in the Sierra Madre Occidental highlands reflecting strong grass and mineral notes with hints of pine and cedar.

	1oz	2oz
La Higuera	8	16

DASYLIRION LEIOPHYLLUM

CHIHUAHUA, COAHUILA & DURANGO | Found in the Chihuahuan Desert, this sotol produces herbal, earthy, leathery flavors reminiscent of the arid climate.
